

# Gigaset DESK 400

The wall and desk phone for simple telephony

## Highlights

- o Easy wall mounting possible
- o Four direct dial keys
- o Power supply via telephone line, no separate power supply unit required
- o Ten speed dial keys
- o Hearing aid compatible
- o Redial
- o Suitable for operation with telephone systems
- o DTMF / pulse dialing adjustable
- o Flash function adjustable

The Gigaset DESK 400 corded desk and wall phone with four direct dial keys and power supply via the telephone line is ideal for use at home or in the office.

### Flexible application options

The Gigaset DESK 400 can be used both as a desk phone and as a wall phone, always ensuring optimal usability. For wall operation, the DESK 400 is simply attached using two screws.

### Power supply via the telephone line

The Gigaset DESK 400 does not require a separate power supply unit; power is supplied directly via the telephone line. Commissioning is therefore particularly simple: connect the Gigaset DESK 400 to the telephone socket (public network, PBX or gateway) - and the phone is ready for use.

### Quickly connected

With the help of the four direct dial keys, important contacts are just a keystroke away. In addition, up to ten phone numbers can be stored as speed dials, allowing you to quickly connect with the people you talk to frequently. The speed dial numbers are noted on the enclosed paper insert and are thus always in view.

### Hearing aid compatible

The Gigaset DESK 400 is hearing aid compatible, especially for people with impaired hearing. Thanks to certification in accordance with the European ITU-T P.370 standard, it enables users of hearing aids with inductive transmission to make phone calls without disturbing noise.
