- Suitable For Professional Use
- Brushless Motor
- LED Indicator
- 360-Degree Rotating Cord
- Luxurious Case
- 3-Meter-Long Cord

BENCHMARK DETAILS

SWITCHABLE AUTOMATIC CURL BARRELS

There are two curl barrels that you can switch between directions. Unlike most multistylers, this function is not common. The AURUM Aerostyler comes with two switchable barrels, one 40 millimeters and one 30 millimeters, providing more variety in curling options.

ROTATING HANDLE

The AURUM Aerostyler handle has a unique feature that simply transforms the overall usability and comfort by allowing the handle of the styler to be switched to another position.

TEMPERATURE UP TO 105°C

The styler operates at a slightly higher maximum temperature compared to most high-end models, making it more suitable for the professional market.

COMES WITH HEAT RESISTANT GLOVE

No other multistyler offers this level of protection; a Max Pro heat-resistant glove is included to ensure you have the proper protection while styling.
